

How to produce your own artists' colours easily with Schmincke ready-to-use-binders

Did you ever want to produce your own colours - but you found it to be very extravagant and complicated? Schmincke now offers a new and easy solution:

You can **easily grind your own** water, oil, acrylic and gouache **colours** with the new **4 binders** and **just one pigment!**

You only need two components:
Schmincke „ready-to-use“-binder
+ Schmincke pigment

= own artists' colour

Schmincke ready-to-use-binders can **easily be mixed** with a palette knife while observing the mixing-ratio indicated. The artists' colour you obtain is ready to use. The binders are available (in 200 ml jars) for heavy body oil colours (Art. 50 810) and acrylic colours (Art. 50 840), for transparent water-colours (Art. 50 830) and mat-opaque Gouache colours (Art. 50 820).

In combination with Schmincke pigments, you will obtain **brilliant and rich colours**. Best results are guaranteed by using high **quality raw material** - as

Pigment + acrylic binder

used in the binders - and **100% pure pigments** from Schmincke. You will be inspired about the easy way to obtain your own, individual colour when you observe the correct mixing ratio (for oil colours binder:pigment 1:1, for acrylic, gouache and water-colours 2:1 binder:pigment). It is no longer necessary to produce larger quantities in order to stock up, you just **grind** new and fresh **colours on demand!**

Try out and enjoy!
