FW Ink is an acrylic-based, pigmented, water-resistant ink with a high degree of lightfastness and intermixability.

FW Ink can be used straight out of the dropper, or diluted to achieve the most subtle of tones, very similar in character to watercolour. Such washes will dry to a water-resistant film on virtually all surfaces* and successive layers of colour can be laid over.

FW inks can be applied using traditional brushes, but also work well through airbrushes, technical pens, and paint markers making them ideal for producing technical illustrations and finely worked drawings. The expressive fluidity of acrylic inks is suitable for use by fine artists, illustrators, graphic designers, calligraphers, decorative artists and hobbyists.
